

# You need to get your project funded?

## There are 3 ways how we can help you:

### TripleFunds

You can search for calls for proposals and donor profiles in our online database called TripleFunds. TripleFunds offers over **4,000 funding opportunities** for NGOs working in developing countries across various sectors (i.e. agriculture, education, health).

More than 11 search filters make it easy to find your perfect match: you can look for specific countries, sectors, donors or grant sizes.

On top, TripleFunds offers webinars (live and recorded) and resource guides on funding topics (i.e. how to access foundation funding, how to write proposals).

*Price: starting from 19€/month*

### Donor Mapping

We can carry out a professional prospect research for you. This means you tell us for which project or organisation you need funding by filling in a questionnaire (3 pages). You define the country, the sector, the donor etc.

Then we carry out the individualised research for you and screen over 500,000 donors by using various sources (i.e. TripleFunds database, other online databases, annual reports of similar NGOs, foundation directories etc.).

You get a document with a description of **40 donors** that are a high potential match for you.

*Price: 600€*

### Proposal Writing

We can assist you in proposal writing to increase the quality of your proposals and therefore your chances to get funded.

There are two options:

(1) We can either write a **new proposal** from scratch (including an on site needs assessment if required).

*Price: upon request*

(2) We can **comment on an existing draft proposal** on how to improve it. This can be done via adding comments in the word document of the proposal or via a personal Skype call.

*Price: 240€ per proposal*
